# CoroPlus® Tool Supply

Tool inventory solutions for control of tool logistics

# Improved control and connected for the future

Users of tool management solution CoroPlus® Tool Supply can organize their equipment and improve their inventory management by applying it to their tool logistics processes.

The shop floor software interface enables operators to pick and return tools, manage restocking and maintain inventory using the same solution.

The usage of the tools on the shop floor feeds data to the management and administration part of the system, allowing tracking of cost, planning jobs and management of purchasing.

CoroPlus® Tool Supply connects with multiple supplier's product databases and allows import of correct tool information, including ISO parameters, bill of material and spare parts.

- Organize and manage your inventory and tools
- Create reports to track assets, consumption and cost to build insights of your inventory
- Streamline and automate your tool purchasing process
- Get started fast, with an intuitive and user-centric interface
- Access the cloud-based software anywhere, anytime, with or without vending cabinet

## Benefits from using CoroPlus® Tool Supply

### CEO
- ✓ Increased productivity
- ✓ Increased profitability
- ✓ Prepared for the future and digitalization

### Finance
- ✓ Reduced administration costs
- ✓ Reduced overall production costs
- ✓ Reduced purchasing costs

### Operations

# Fitted to your needs

Our tool logistics software and hardware will provide a tailor-made solution to meet your needs for control. We offer vending solutions ranging from open stock, drawer or lids to cabinets.

### Open stock
Without access control

### Drawer/lid
Multiple quantities of tools to pick from

### Cabinet
One tool at a time, for full control

## Features

- Securely store tools
- Pick and return tools
- Restock items
- Identify obsolete or low use items
- Create and manage purchase orders
- Track tool cost for a specific job
- Import product data
- Find product related items
